Dear Vlad, Dear Mazaher,

I would like to thank you for agreeing to serve as external reviewers for Virginia Casella's doctoral thesis in Systems Engineering, entitled Optimization and Control of Energy Communities in the Energy Market (PDF included in attachment).

The review should be completed and sent in digital format to phd.compsci@dibris.unige.it by April 13, 2026 (approximately one month, as required by national regulations).

Attached you will find a template prepared by our Doctoral College that suggests a possible structure for the review.

The candidate will be asked to take the reviewers' comments into account when preparing the final version of the thesis, which will be made publicly available as a technical report in our University's IRIS archive two weeks before the final exam.

We would also be very pleased to invite you to serve on the final examination committee (the date will be agreed upon once the revisions have been completed). The defense can of course be organized online.

We look forward to your positive response and thank you again for your
